

Case for Change Development

METHODOLOGY

We develop Cases for Change to provide a robust, evidence-based rationale for proposed changes to training package components to support industry skills needs and Council of Australian Governments (COAG) Industry and Skills Council (CISC) priorities.

When a Case for Change is approved by the Australian Industry and Skills Committee (ASIC) it forms the basis of a training package project.

GOVERNANCE

Case for Change development work is overseen by the relevant Industry Reference Committee (IRC).
